

V. Colour Palette

CORE COLOURS

Our core palette consists of our hero colour, V. Green, and our supporting complement of highlights and neutrals, Vision Green, Breaker White and Mariana Black. Using these colours reinforces brand recognition and differentiates us from our competitors.

EXTENDED PALETTE

While we stick to our core palette most of the time, when we need extra flexibility, for example in UI elements or graphs, we can draw from the extended palette. This gives us the flexibility to communicate more complex information.
